

# Disaster Recovery Planning for Small Businesses

## *Prepare, Plan and Prevail!*

*Learn planning techniques that will prevent a disaster  
from closing your doors.*

Every year emergencies take their toll on business and industry — in lives AND dollars. Planning before a disaster strikes is key to business survival. By planning ahead, you can limit injuries and damages to your business, and return more quickly to normal operations.

### WORKSHOP OVERVIEW

Join us for a free interactive workshop that provides hands-on training to build a continuity plan for your business. Listen to keynote speakers from successful businesses share their stories of what worked and what didn't work in the wake of a disaster, and learn how these tips can help you in your own planning.

***By participating in this interactive workshop,  
you will have your own business continuity plan started,  
and a list of specific action items to take back to your office.***

**In addition to first-rate instruction and information, all attendees will receive a Continuity Planning for Small Businesses Resource CD** containing template plans, checklists and guidelines to start planning for your business immediately.

### REGISTRATION

**There is no fee to attend this event. Register to reserve your seat as soon as possible.**

Thursday, March 26, 2009, 8AM to 12PM
